31 October 1960

STAT

Dear

STAT

I wish to express my appreciation to you for the tour and briefing given to members of my staff covering [redacted] production facilities and the test firing area [redacted] on 20 October 1960. Their visit has provided them with background information and knowledge of missile engine production and testing which could be gained in no other way. The excellent tour of plant activities conducted by [redacted] and of the engine test facilities by other staff members provided the group with firsthand knowledge from experts.
